DETAILED ACTION

Allowable Subject Matter

Claims 1-30 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 1, and specifically comprising the limitation of the electrode separator includes a first region having a pattern structure for separately forming the organic light-emitting layer and the second electrode within each of the sub-pixels, a second region having a pattern structure for directly contacting the connecting electrode with the second electrode under the electrode separator, and a third region having a pattern structure for preventing an electrical short between a second electrode portion in the first region and a second electrode portion in the second region, and wherein the second electrode formed within a space corresponding to the second region contacts the connecting electrode.

Regarding claims 2-10, claims 2-10 are allowable for the reasons given in claim 1 because of their dependency status from claim 1.

Regarding claim 11, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 11, and specifically comprising the limitation of the electrode separator includes a first region having a trapezoidal shape with a width partially increasing from a bottom surface and to a top surface, a second region having an asymmetrical shape with a first inverse-tapered lateral side and a second lateral side inclined toward the first lateral side, and a third region having a plurality of depressed portions spaced apart from each other and disposed between the first and second regions, and wherein the second electrode is formed within a space corresponding to the second region and contacts the connecting electrode.

Art Unit: 2879

Regarding claims 12-21, claims 12-21 are allowable for the reasons given in claim 11 because of their dependency status from claim 11.

Regarding claim 22, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 22, and specifically comprising the limitation of the electrode separator has a first region having a trapezoidal shape with a width partially increasing from a bottom surface and to a top surface, a second region having an asymmetrical shape with a first inverse-tapered lateral side and a second lateral side inclined toward the first lateral side, and a third region having a plurality of depressed portions spaced apart from each other and disposed between the first and second regions.

Regarding claims 27-30, claims 27-30 are allowable for the reasons given in claim 22 because of their dependency status from claim 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Prior Art Cited

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
